📘 MidJourney Beginner's Quick Start Guide

A simple and effective walkthrough for new users to start generating stunning AI illustrations using MidJourney V6

🛠️ How to Get Started

MidJourney is an AI-powered tool that generates images based on written prompts. It works through a Discord server where you type your prompt, and the AI returns a 2x2 image grid.

✅ Step-by-Step:

1. **Create a Discord account** at discord.com
2. **Join the MidJourney server** via https://discord.gg/midjourney
3. **Subscribe to a plan (Basic/Standard/Pro)** on midjourney.com

Go to a "Newbies" or private channel and type:
`/imagine prompt: your idea here`

💼 Key MidJourney Settings

Use the command `/settings` in the MidJourney Discord channel. Here's what you should know:

- **Model Version**: Select V6 (best natural language understanding)
- **Remix Mode**: ON = allows editing prompts during variations
- **Style**: RAW (less stylized, more prompt-accurate) or default
- **Quality**: Ranges from 1 to 2 (`--q 2` gives more detail but uses more credits)
- **Uplight / Upbeta**: Choose how upscaled images are enhanced

✍️ Writing Good Prompts

MidJourney V6 understands grammar! Use descriptive and structured language.

🌟 Prompt Formula:
`/imagine prompt: [Subject], [Appearance], [Background], [Lighting], [Style], [Camera details] --ar [aspect ratio] --v 6.0`

🎨 Example:
`/imagine prompt: A woman in a red cloak walking through a misty forest at sunrise, volumetric lighting, cinematic style, shot on 85mm lens --ar 2:3 --v 6.0`

📐 Important Parameters You Can Add

Parameter	What It Does
`--ar`	Aspect ratio (e.g., 16:9, 1:1, 2:3)
`--v 6.0`	Uses version 6 of the AI model
`--style raw`	Reduces default beautification, more accurate
`--tile`	Makes a seamless, repeating pattern
`--s 100`	Stylization strength (higher = more artistic)
`--no`	Exclude elements (e.g. `--no text`)

🧠 Pro Tips for Beginners

- 🖼️ Use real-world references in your prompts (e.g., "shot on Canon RF85mm")
- ⛅ Mention lighting: *golden hour*, *soft shadows*, *studio lighting*
- 📸 Think in photography terms: angle, lens, emotion, color palette
- 💬 Use natural, complete sentences in V6 — it's language-aware!
- 🔁 Don't like the result? Use " 🔁 Reroll" or " 🔄 Vary (Subtle)" for versions
-

🧱 Best Practices When Creating Your Illustrations

- Focus on **clarity**: too many ideas = chaotic image
- Keep prompts **balanced**: not too short, not too over-explained
- Refine: build prompt complexity over time
- Start small, tweak, and reroll until you're happy

🛠️ MidJourney Settings & Modifiers You Should Try

Purpose	Modifier
Seamless pattern tiling	`--tile`
Natural photoreal style	`--style raw`
High realism & detail	`--stylize 50` to `--s 100`
Extra cinematic feel	`volumetric lighting`, `rim light`, `bokeh`, `hdr`
Lighting focus	`golden hour`, `soft diffused`, `spotlight`

Color control	`cool tone`, `vibrant`, `pastel`, `monochrome`
Camera feel (photorealism)	`Canon RF85mm`, `Leica`, `35mm`, `f/1.4`, `ISO 100`

🧠 **Tip:** Copy any of the prompts into MidJourney's prompt box on Discord, and they're ready to go. You can tweak *any part* – subject, lighting, ratio – and get totally different, incredible results! 🎨 🚀

🌟 **Reminder**: You can also combine or remix elements – like "Style raw", "--s 100", or add your own twist with a photographer's name or reference image.
